Full Feature Gap Analysis

Cord Cleaning vs. Xero, QuickBooks & Industry-Standard Accounting Software

Every finance/accounting-adjacent feature checked against this codebase across three independent code audits — nothing asserted here without a concrete file, endpoint, or grep result behind it.

27 September 2026

18	12	8	61
Fully have	Have — advantage	Partial	Missing

99 features checked in total across 16 categories.

How to read this

- **HAVE** — real, working, evidenced by a live endpoint/component.
- **HAVE ★** — real, AND something Xero/QuickBooks don’t offer natively (our differentiators).
- **PARTIAL** — exists in a limited/manual/stub form.
- **MISSING** — grepped for and confirmed absent, not just "not seen yet".

A. Core Accounting Engine

Feature	Status	Evidence / Notes
Double-entry general ledger	MISSING	No ChartOfAccounts/journal entity anywhere; FinanceLedgerEntry is a single-entry cash log only.
Chart of accounts	MISSING	Not present in the entity model.
Journal entries	MISSING	No journal/ledger-pair concept exists.
Multi-currency	MISSING	No 'currency' field on any tenant entity or DTO.
Multi-currency revaluation / FX gain-loss	MISSING	Depends on multi-currency, which doesn't exist.
Cash vs. accrual accounting toggle	MISSING	No such setting; system is implicitly cash-based.
Read-only accountant/bookkeeper access	MISSING	No such role or invite flow found.
Full journal-level audit trail	PARTIAL	Module-level audit log + salary-change history exist; no transaction/journal-level trail.
Data import / migration tools	PARTIAL	InvoiceExcelImportService bulk-imports invoices+payments from a zip of .xlsx per company (migration tool) — no chart-of-accounts or opening-balance importer, since there's no COA to import into.

B. Tax & Compliance

Feature	Status	Evidence / Notes
GST/tax on invoices	PARTIAL	Flat 10% only (FinanceUtils.DEFAULT_GST_RATE); a SECOND, conflicting hardcoded GST calc exists in FinanceServiceImpl.reconcile (÷1.1) — a live data-integrity bug.
Multi-rate tax codes	MISSING	No tax-code concept; one flat rate tenant-wide.
BAS (Business Activity Statement)	MISSING	No file/endpoint/DTO of any kind; grepped whole repo, zero hits.
GST collected-vs-paid summary report	MISSING	GST is a per-line calculation only, never aggregated.
PAYG withholding summary	MISSING	No withholding calculation exists at all (see Payroll).
Direct tax-authority lodgement (e.g. ATO SBR)	MISSING	No lodgement integration of any kind.
Contractor/1099-style payment summary reporting	MISSING	No such report; subcontractor payments aren't aggregated for this purpose.

C. Financial Statements

Feature	Status	Evidence / Notes
Profit & Loss / Income Statement	MISSING	Nearest features (Site Profitability, dashboard KPI tiles) are not a line-itemized company-wide P&L.;
Balance Sheet	MISSING	No assets/liabilities/equity modelling anywhere.
Cash Flow Statement	MISSING	Dashboard shows cash in/out tiles, not a formal statement.
Financial Year / Annual report	MISSING	getYearOverYear() is a comparison chart, not an FY close/report.

Feature	Status	Evidence / Notes
Trial balance / general ledger detail report	MISSING	No GL exists to report from.
Industry benchmarking reports	MISSING	No such feature.

D. Invoicing & Receivables

Feature	Status	Evidence / Notes
Create/send invoices, PDF generation	HAVE	InvoiceController + InvoicePdfController, full CRUD + email send.
Partial payments / payment tracking	HAVE	InvoicePayment records; UNPAID/PAID/PARTIALLY_PAID/CANCELLED statuses.
Aging / overdue tracking (internal)	HAVE	Debtor-aging buckets + carry-forward balances on the dashboard.
Customer-facing account statements	MISSING	ClientPortalController exposes invoice list/detail only — no statement document.
Client 'Pay Now' / embedded payment checkout	MISSING	Stripe integration only creates payment LINKS for staff to send manually; nothing embedded in the client portal.
Recurring / subscription customer invoices	MISSING	No scheduler that raises a customer invoice on a cadence.
Credit notes	MISSING	No such document type.
Progress / deposit invoicing tied to a quote	MISSING	Quote-to-site conversion is direct, no staged billing.
Batch invoicing / batch payments	MISSING	No bulk-create or bulk-pay endpoint found.
Customer credit limits	MISSING	No creditLimit field on the Company (client) entity.
Late payment fees / interest on overdue	MISSING	No such calculation exists.
Automated payment reminder emails (dunning)	MISSING	Reminder jobs exist for certifications/shifts/documents — none for overdue invoices.
Billable expenses (rebill to client)	MISSING	No billable/rebill flag on StaffExpenseClaim; unrelated 'billable' flags exist only on timesheets/utilization.

E. Quotes / Estimates

Feature	Status	Evidence / Notes
Quote creation with cost & margin calc	HAVE ★	More sophisticated than Xero/QBO's basic estimate: uses per-role labour-cost profiles, tenant-configurable overhead % and target margin %.
Quote PDF / email	HAVE	QuotationController + QuotationPdfServiceImpl.
Client-facing quote accept/decline	MISSING	Explicit code comment confirms: status is set by an internal user, not the client.
E-signature on quotes	MISSING	A generic DocuSign integration exists (used for contracts/toolbox talks) but is not wired to quotes.
Quoted-vs-actual margin tracking	HAVE ★	Compares quoted hours/price/margin to actual per site — Xero/QuickBooks don't offer this natively.

F. Payables / Vendor Management (Accounts Payable)

Feature	Status	Evidence / Notes
Purchase orders	**MISSING**	No PO entity/flow exists.
Vendor / supplier bills	**MISSING**	No Vendor/Supplier/Payable/Bill entity anywhere in the codebase.
Recurring bills (accounts payable)	**MISSING**	Only recurring construct is ScheduledExpense, an internal operational cost, not a vendor bill.
Batch vendor payments	**MISSING**	No such flow (no vendor bills to pay in the first place).
Vendor/supplier contact management	**MISSING**	CRM module covers customer-side leads/deals only; no supplier register.

G. Expenses

Feature	Status	Evidence / Notes
Staff expense claims + approval	**HAVE**	Mileage or amount claim, receipt upload, admin approve/reject with notes.
Multi-level / multi-step approval workflow	**MISSING**	Single-step PENDING/APPROVED/REJECTED only — no approval-chain concept anywhere in the codebase.
Receipt OCR / auto data extraction	**MISSING**	Mobile capture is a photo attachment only; no OCR/text-extraction of amount or vendor.
Billable-to-client expense flagging	**MISSING**	See D. Billable expenses.
Recurring internal/operational expenses	**HAVE**	ScheduledExpense: one-time/daily/weekly/monthly, posts to the ledger.

H. Fixed Assets & Inventory

Feature	Status	Evidence / Notes
Fixed asset register	**MISSING**	No FixedAsset entity.
Depreciation schedules (straight-line/diminishing)	**MISSING**	No depreciation calculation exists.
Inventory / stock management	**MISSING**	No inventory module in the product at all — confirmed by two independent greps.

I. Banking

Feature	Status	Evidence / Notes
Live automatic bank feeds	**MISSING**	No Plaid/Basiq/Yodlee/open-banking integration anywhere.
Bank reconciliation	**PARTIAL**	Manual CSV/Excel upload + a client-side heuristic confidence-score matcher — not a live feed.
Bank rules / auto-categorization	**MISSING**	No rule-engine for recurring transaction categorization.
Cash flow forecasting / prediction	**MISSING**	No forward-looking projection tool; only historical dashboard tiles.
Multiple account types (bank/credit card/loan)	**PARTIAL**	One flat, generic BankTransaction concept — no distinct account types.

J. Payroll

Feature	Status	Evidence / Notes
Hours × rate pay runs, manual adjustments	HAVE	Preview/save pay runs, deduction/extra line items, mark paid, per-site cost breakdown.
CSV export for third-party payroll processors	HAVE	ADP/Gusto/MYOB-compatible flat-file export.
Self-service payslip access for staff	MISSING	Code comment confirms: no 'my payslip' endpoint exists.
Payslip PDF generation	MISSING	No Payslip/PaySlip file of any kind in the codebase.
Leave accrual tied into payroll	MISSING	No LeaveBalance/LeaveAccrual entity; zero hits for 'leave' in payroll calc code.
Award-rate / overtime / penalty-rate rules	MISSING	Pay is a straight hours×rate calculation only.
PAYG tax withholding calculation	MISSING	Not calculated anywhere.
Superannuation calculation / clearing house	MISSING	Only plain storage fields (fund name/number) exist — no calculation or fund-payment integration.
Single Touch Payroll (STP) reporting	MISSING	No STP/ATO reporting integration.

K. Budgeting, Categorization & Analytics

Feature	Status	Evidence / Notes
Budget creation/editing	MISSING	Budgets are set via Site Role Management; Finance tab only displays them read-only.
Budget vs. actual reporting	HAVE	Per-site annual/monthly budget vs. spend with variance.
Tracking categories / classes / departments	MISSING	No cross-cutting segment-tagging concept on transactions.
Custom fields on invoices/transactions	MISSING	Invoice fields are fixed; no metadata/extra-field map.
Site profitability (per-site P&L;)	HAVE ★	Revenue, invoiced, outstanding, staff/supply/site cost, profit, clean count — native and industry-specific.
Staff utilization % (billable vs. available hours)	HAVE ★	Not offered natively by Xero or QuickBooks.
Supervisor / staff performance scorecard	PARTIAL	Real in-app ranked view (attendance + inspections + incidents); no dedicated export/PDF.

L. CRM & Contacts

Feature	Status	Evidence / Notes
Contact / customer database	HAVE	Full CrmContact entity and controller.
Lead management + pipeline stages	HAVE ★	CrmLead + CrmPipelineStage with conversion flow — neither Xero nor QuickBooks core includes a sales pipeline.
Deal tracking	HAVE ★	CrmDeal entity with pipeline stats.
Activity / task log per contact	HAVE ★	CrmActivity + CrmTask give a real CRM activity trail.
Customer credit limits	MISSING	See D.

M. Reporting (see also the separate Report Generation breakdown)

Feature	Status	Evidence / Notes
Generic CSV export on any data table	**HAVE**	Built into the shared Table.tsx component, used across the app.
Custom report builder with saved templates	**HAVE**	5 curated data sources, drag-reorder columns, one filter, saved ReportTemplate CRUD.
Full tenant data export + scheduled backup	**HAVE**	On-demand or scheduled ZIP of 16 CSVs, emailed by a daily cron job.
Attendance / timesheet / AR ledger / audit-log exports	**HAVE**	All implemented as Excel/CSV/PDF exports with real filters.
Per-document PDFs (invoice/quote/inspection/toolbox talk)	**HAVE**	All confirmed working, role-scoped where relevant.

N. Platform, Access & Ecosystem

Feature	Status	Evidence / Notes
Module-level RBAC (role × module permissions)	**HAVE**	RoleModulePermission grants read/write/update/delete per module (Finance, Payroll, Quotes, CRM are each independent modules).
Granular sub-module finance permissions	**MISSING**	Can't grant e.g. invoice-only or bank-recon-only access within Finance — it's all-or-nothing per module.
Read-only accountant role	**MISSING**	No such role exists.
Public developer API	**PARTIAL**	A real, authenticated (API-key) public API exists but is deliberately narrow — only /sites and /staff, explicitly no financial or personal data.
App marketplace / integration ecosystem	**PARTIAL**	Stripe, Twilio SMS, Slack, DocuSign, generic webhooks — a handful vs. Xero's 1,000+ or QuickBooks' app store.
Actual Xero/QuickBooks data sync	**MISSING**	OAuth 'Connect' buttons exist for both; no invoice-push/sync service behind them — scaffolding only.
Multi-entity / multi-business consolidated login	**MISSING**	Single-tenant-per-login multitenancy; no cross-tenant consolidated view.
Staff mobile app (clock-in, photos, expense claims)	**HAVE**	Dedicated mobile app repos — something neither Xero nor QuickBooks provide for field staff.

O. Fleet & Fuel (industry-specific)

Feature	Status	Evidence / Notes
Vehicle registry + mileage logs	**HAVE ★**	Full CRUD, odometer tracking — outside Xero/QuickBooks' scope entirely.
Fuel card transaction reconciliation	**HAVE ★**	Import, match to vehicle/staff, exclude — same pattern as bank reconciliation, fuel-specific.
Vehicle maintenance records	**HAVE ★**	Dedicated widget/tracking.

P. Client Portal (industry-specific)

Feature	Status	Evidence / Notes
Client invoice view + PDF download	**HAVE**	Role-scoped, client sees only their own invoices.
Photo-proof of clean (before/after)	**HAVE ★**	Nothing comparable exists in general accounting software.
Inspection score visibility	**HAVE ★**	Circular score gauge per clean, tied to real inspection data.
Client-facing online payment	**MISSING**	See D. — no checkout embedded in the portal.

Bottom Line

Of 99 features checked, this system fully or partially covers 38 and is missing 61. 12 of the ones it covers are things Xero and QuickBooks don't offer at all — this product is not trying to be an accounting system, it's an operations platform for a field-services business with a solid invoicing/payments/reporting layer bolted on. The gaps cluster almost entirely into five buckets: formal accounting (GL/statements/BAS), accounts payable (no vendor bills/POs at all), payroll compliance (PAYG/super/STP/award rates), live banking (feeds/rules/forecasting), and revenue-capture polish (online payment, dunning, credit notes, recurring billing).

If there's a specific everyday Xero or QuickBooks feature you rely on that isn't listed above, flag it and it'll get the same file-level verification as everything else here.

Compiled from three independent code audits of multitenant_cleaning_backend and cleaning_frontend. Every ABSENT verdict is backed by an explicit grep with zero matches; every REAL/PARTIAL verdict cites the concrete file, entity, or endpoint responsible.
